There seems to be some confusion as to what was elected as Group II in paper number 11. The Examiner thinks it would help clarify the situation if in addition to the restriction between inventions of paper no. 10, an Election of species is made at this time. Please keep in mind that in electing a single Figure as the preferred embodiment only those claims reading on the structure shown in the elected Figure will be examined.

This application contains claims directed to the following patentably distinct species of the claimed invention: the species of Figure 1, 2, 4, the species of Figure 26, the species of Figure 27, the species of Figure 31 all include at least one table and at least one console; the species of Figures 5,6, the species of Figure 9 which contrary to the statement on page 5, lines 25, 26 is not a view of Fig.5, the species of Figure 24, all showing different consoles; the species of Figure 12, the species of Figure 19a, the species of Figure 20, all showing elements of raceways; the species of Figure 28, the species of Figure 29, the species of Figure 30, the species of Figure 31, all showing linkage elements of raceways.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
